Dec 16, 2018 The reason you cannot uninstall Autodesk AutoCAD 2009 is because there are many third party programs that reference the registry settings, and the uninstall process will not delete or disable those programs. This is what is causing you to be stuck. I have installed AutoCAD 2013 (32bit) on a Windows 7 64bit laptop. I am facing a problem in that I am unable to find the Autocad 2013 launcher icon. Jan 24, 2017 Autocad 24 Service Pack 1 is not available for 32 bit systems. Oct 9, 2017 For installation, you need to know that the AutoCAD 2009 Installer doesn't have a 64-bit version of Windows 7 available for Windows 7 x64. To work around this, you would have to use the standalone 32-bit version of Windows 7, which won't run on 64-bit Windows 7 systems, as the standalone 32-bit installers for the product license were not released for x64 Windows 7. Apr 9, 2013 So I downloaded Autocad 2010 to install on my 64bit Windows 7 machine. However after installation, the Autocad 2010 installer states that I do not have enough disk space to create an Autocad2010 folder on my Desktop. It says I have 77% of disk space remaining, yet it only has 37% of disk space remaining. I can start Autocad 2010 in safe mode in the Autocad2010 folder in the Program files, but the 64bit application fails to start. A.autocad start file provides no error info in safe mode either. Attempting to start the 64bit version of Autocad2010 in a 32bit app. folder or just Autocad2010 fails to start. Windows looks to make a backup folder in the Autocad2010 folder which is full even though it is in full. I even removed the Windows 7 (64bit) completely, re-installed it and then tried the 64bit Autocad2010 as before. Same problem occurs of not enough disk space. When I do the Vista control panel cleaning thing and remove the Autocad2010 program icon from the Start Menu, it later reappears because it requires adding it back to the start menu. Nov 26, 2011 I just downloaded the free trial of the AutoCAD 2012 software and have completed installing it. However, the trial only works on Windows 7 and nothing else. It says there is an error with the distribution
